

Value-Added Services – We can do a lot for you

Goods are as different as their customers. Some have to get to their destination as quickly as possible, others only have to be unpacked or repacked after a long journey. Others still require special processing or should only be delivered by a very specific date. All of this is possible with us.

Quality control

We check the quality of the goods immediately after the arrival of shipments. Strict adherence to the cold chain is particularly important for foodstuffs.

If you stay longer, our warehouse specialists regularly check the condition of the goods and, if necessary, the packaging. For this purpose, we also create separate quality reports for food. Imported goods are also subject to approval by the veterinary office. We take the samples together with the customs officials, the Federal Office for Agriculture and Food and the veterinary office as well as with the customers and ensure that the formalities run smoothly.

Campaign logistics

Delivered on time!

We work with large retail chains that need to temporarily store certain promotional items and ensure that they are in the right place at the right time. If something changes in the campaign at short notice, our team is able to relabel so that the goods can still arrive just in time.

Goods processing

Goods are not only stored in our business premises. We also offer a range of additional services.

New and repackaging

Do goods have to be repackaged in larger or smaller containers? No problem. We repackage them according to your wishes. We are specialists in palletizing.

Marking out and Neutralising

It happens again and again that goods have to be relabelled. We have all the equipment for labelling and tagging.

Sorting and picking

If damaged or spoiled goods have to be sorted out from perfect goods, we take care of that. We are happy to pick individual shipments.

Container handling

Containers are the means of transport of the present. Handling containers is therefore one of the core competencies of our warehouse operations. Since many foods can only be transported at certain temperatures, otherwise they will spoil, the distances from the container open areas to the air-conditioned and specially temperature-controlled warehouses are extremely short.

Quality

Our company has been certified since 2006. We store and process dry and fresh food as well as certified organic products according to these specifications. In order to do justice to each product, we maintain various locked rooms in a wide range of temperatures.

IFS certificate

Organic certificate

- Carrier
- Goods processing

Storage. Logistics. Services.
– At the Port of Hamburg –

Warehousing of goods

Refrigerated and climate-controlled storage

Forwarding and Transport – We move your goods

Heinrich Osse Lagerhaus GmbH is a traditional company in the heart of the Port of Hamburg that specializes in warehousing and all kinds of logistics services. In the historic 50er storage sheds and in an external warehouse in Hamburg-Moorfleet, we process both food and non-food items with the most modern equipment.

We move up to 20,000 TEU every year, door-to-door if required. Our company has been certified since 2006. We store and process dry and fresh food as well as designated organic products according to these specifications. In order to do justice to each product, we maintain various closed rooms at different temperatures.

IFS certificate

Our second mainstay is the storage and processing of general cargo. Non-food items of all kinds find shelter with us according to the wishes of the customers until they are delivered on time.

Organic certificate

Storage is not just storage

Each product has its specific properties. One needs to be stored in a dry place, the other without the influence of light, and another needs to be kept cool but not freezing.

We are set up for all these goods. At two locations, (Austriastrasse and Andreas-Meyer-Straße) we maintain a total of over 35,000 square meters of indoor storage space and over 15,000 square meters outdoors. Enough space to unpack, relocate or process goods. This also includes custody and open bonded warehouses, so that the import and export of goods from or to overseas can be handled with us without any problems.

A special warehouse for each product

We have plenty of space for a wide variety of products in our two warehousing facilities. Our main items come from the non-food sector, such as bicycles and promotional items for retail groups. We also store a wide variety of foods.

It is irrelevant how the goods reach us. Whether in containers or as general cargo, whether on pallets, in sacks, barrels or big bags. Each shipment is carefully checked by us and, if necessary, defective goods are also sorted out. We then store them in the way that is best for them. Some on shelves, others as block storage. Trust our decades of experience.

Cargo handling

We move your goods

Apart from mere warehousing, we offer an all-in-one service. Our forwarding department collects the goods from your company or from the quayside and brings them to our premises. There we process them according to your wishes. We then transport the cargo to the destination or to further transport by ship. We maintain our own container packing station for this purpose.

As an individual service we offer:

- Container shipment
- Unloading and loading of collective loads, general cargo and special offers
- Palletizing
- Picking
- Quality control
- Container handling

Special temperature control for a wide range of temperatures

We store tropical fruits such as bananas, lemons, oranges or other fruit and vegetables such as apples, grapes, potatoes, onions or garlic. In addition, other foods such as chocolate and seasonal goods. We maintain four storage rooms with special temperature control. From -1 ° to +25 ° Celsius, a wide variety of goods can feel comfortable with us, depending on which climate is best for them.

We offer a total of 3,200 square meters of space. Together with the customer and, if necessary, the veterinary office or the Federal Office for Agriculture and Food, we also check the quality of the goods.

All from a single source

Osse Spedition und Transport GmbH organizes daily truck departures throughout Germany. We cover larger distances to other European countries with partner companies, so that we can reach every point in continental traffic for you without any problems.

On request, we can organize door-to-door transport for you, so you don't have to worry about anything. Our experienced dispatchers guarantee a smooth process. We would also be happy to take care of the pre-carriage and on-carriage concept for you if the goods are to be transported further by rail or ship.

Truck transport

Nothing is too far for us

We handle transports of all kinds. We have over 30 of our own chassis and plan trailers for oversized sizes. We use box and thermo trucks as well as semi-trailers up to 13.60 meters long with tarpaulins and road trains. Our team organizes everything – from simple port transfers to Germany-wide deliveries.

We collect your goods from the nearby terminals of the Port of Hamburg and bring them directly to your premises. If the goods still need to be processed by us, we can also take care of the on-carriage if you wish.

Our service includes:

- Food transports
- Lift delivery
- Timely delivery within 24/48 hours
- Transportation of import groupage

Container transport

Your goods are in good hands with us

Our operations handle around 15,000 TEU annually. On request, we collect the containers from the port or from our customers. We transport full containers as well as empty ones that are only loaded on site. Since there are also numerous connections for refrigerated containers on the Osse premises, we also have no problem with the interim storage of reefers and standard containers. A large reach stacker moves the boxes from the warehouse to the trucks in no time.
